## SUMMARY

Results-driven Web Developer and Software Engineer with First-Class Honours in Computer Science and hands-on experience building, customizing, and optimizing modern WordPress websites. Adept at developing custom themes, configuring complex plugins, and utilizing page builders like Elementor to deliver high-performing, responsive digital solutions. Strong proficiency in PHP, HTML, CSS, JavaScript, and MySQL, combined with expertise in business automation (n8n) and UI/UX design. Proven track record of managing full-stack web applications and optimizing digital platforms for speed, security, and SEO performance.

## EXPERIENCE

### Associate Software Engineer

June 2026 – Present

Webxkey | Full Time (On Site)

- Developed responsive WordPress websites using Elementor and custom solutions.
- Built Laravel-based POS, inventory, and business management systems.
- Optimized website performance, responsiveness, and user experience.
- Automated business workflows using n8n, WhatsApp API, and webhooks.
- Collaborated with designers and developers to deliver high-quality client projects.

### Software Engineer Intern

September 2025 – June 2026

Webxkey | Full Time (On Site)

- Developed and maintained responsive WordPress websites.
- Assisted in Laravel application development and backend modules.
- Built automation workflows using n8n and third-party integrations.
- Fixed bugs, optimized website performance, and improved UI/UX.
- Worked in an Agile team to deliver production-ready solutions.

### Web Developer & Social Media Assistant

August 2024 – April 2025

Webxkey | Full Time (On Site)

- Managed and maintained the company's WordPress website.
- Developed new web pages and updated website content.
- Improved website performance, SEO, and mobile responsiveness.
- Designed digital marketing materials and social media content.
- Provided technical support and website maintenance.

## EDUCATION

### BSc (Hons) in Computer Science

2025-2026

University of Bedfordshire (UK) | SLIIT CITY UNI (SL)

Grade : First Class Honours

### Higher National Diploma in Computer Engineering

2021-2024

Marwadi University (IND) |

Grade : First Class With Distinction

### Diploma in English Language and Literature

2024-2026

Aquinas College of Higher Studies (SL) |

---

## SKILLS

- **Core Web Development:** WordPress CMS, Custom Theme Customization, Plugin Integration, Elementor, WP Bakery, Responsive Design, Cross-Browser Compatibility.
  - **Languages & Technologies:** HTML, CSS, JavaScript, PHP, Python, Java
  - **Frameworks & Libraries:** Laravel, React, Bootstrap, Spring Boot, Tailwind CSS
  - **Database Technologies:** MySQL
  - **Tools and Platforms:** GitHub, Figma, WordPress, Cursor, VS Code
  - **Methodologies:** Agile, Scrum, PRINCE2, Iterative Development, Clean Code Practices
  - **Soft Skills:** Creativity, Problem-Solving, Time Management, Team Collaboration, Adaptability, Management Skills
  - **Automation & Workflow Tools:** n8n (Cross-Platform Automation – WhatsApp API, Facebook Pages, Instagram, Webhooks, Database Triggers, and Third-Party API Integrations)
- 

## PROJECTS

### ● **HERIT-EDGE: E-Commerce Platform with AI Image Processing** | [Final-Year Project] | ([GitHub Link](#))

Developed a multi-vendor e-commerce platform with Admin, Customer, and Seller panels, featuring AI-powered visual product recommendations. Built a PHP and MySQL backend to manage products, orders, authentication, and vendor operations. Integrated FastAPI and MobileNetV2 for image-based product search, and designed responsive interfaces with CSS. Implemented advanced search, secure checkout, and chatbot features to enhance user experience and engagement.

**Technologies & Skills:** PHP, MySQL, FastAPI, Python, MobileNetV2, CSS, Jupyter Notebook, OpenCV, Computer Vision, Image Processing, Deep Learning, Chatbot Integration, Multi-Vendor Architecture, FAST API, E-Commerce Development, Role-Based Access Control (RBAC)

### ● **WhatsApp-Based Clinic Appointment Automation System** | [Group Project] | ([GitHub Link](#))

Developed a WhatsApp-based automated clinic appointment system using n8n workflows that allows patients to book appointments based on clinic availability, automatically generating token numbers after collecting patient details. Implemented features to book, reschedule, cancel, and view appointments directly through WhatsApp. Built a Laravel backend with role-based panels for patients and receptionists to manage tokens, schedules, and real-time appointment status, along with automated confirmations and reminders to streamline clinic operations.

**Technologies & Skills:** Laravel, PHP, n8n Automation, WhatsApp API, MySQL, Workflow Automation, Role-Based Access Control, Real-Time Scheduling, Backend Development, System Integration

---

## CERTIFICATE COURSES

### **Become a WordPress Developer – DP Education IT Campus**

Successfully completed the comprehensive WordPress course verifying core competencies in CMS management, layout deployment, and platform configuration.

**Key Skills Gained:** WordPress CMS Management, Theme Installation & Customization, Content Structure & Layout Design, Responsive Web Practices
